I'll wait, as I'm sure once I make it public among other distributors in my industry.... someone will try to find the way to delay and / or stop the process.

Let me know once it's fully approved.

Thanks,

The application has been approved for publication which is public. It gives others the opportunity for 30 days to file paperwork opposing the registration of the trademark. It has not been published yet. The typical odds are 1 in 300 that an opposition would be filed. If another company has been using this trademark they may or may not notice that it is published, the chances are pretty slim particularly considering they themselves do not have a trademark registration for that name.

Thank you.

Am i the owner of ZENU Brand at this time?

I've been holding on having packaging material printed pending this approval. Once it's public, there will be people who will try to stop it. Do I need to wait for more approvals / steps?

Thanks,

Be advised that the examination phase of your trademark registration is complete. All office actions have been satisfied and your trademark is approved for publication. The date of publication in the USPTO Official Gazette will be established in the coming weeks. A notification of the publication will be sent from this office the day of the actual publication.

**\*WARNING\***

The Official Gazette is available to anyone and many third parties use information about published marks to sell services. One service of particular concern is a company offering "International Publication". This service implies that by paying an additional fee you will be published internationally. The solicitation is sent in the form of a

bill. Though the amounts vary, some are requesting as much as \$1600.00. There is no basis for additional publication. There are no further fees due.

You have already paid for publication.
